

NetCase

High Performance Portable Connectivity

Onwave's portable all weather solution, NetCase, provides optimised site connectivity for field operations. NetCase contains a powerful SD-WAN router capable of combining the service from all four UK mobile networks, eliminating the reliance on a singular provider.

Keeping your remote workers connected is vital, especially in an emergency. This ensures that your workers can contact the emergency services or headquarters quickly and easily. You can also communicate easily in real time without downtime, which is essential for productivity and collaboration.

Network in a box

- IP rated Peli™ case
- A powerful dual SIM cellular router
- High gain Mi-Mo antennas
