

Connect your business with Starlink

Next Generation Internet

Starlink is a next generation satellite internet service designed to deliver high-speed, low latency, reliable broadband internet globally. From urban centres to off-grid and remote locations, Starlink provides consistent connectivity, something traditional options fail to do.

It is quick and easy to install, and suitable for any size business operating in any industry! All it needs is power and a clear view of the sky and your business can enjoy full connectivity.

Terminals

Starlink can be delivered via a choice of terminals, including the Starlink Performance, the Starlink Enterprise and the Starlink Mini.

PERFORMANCE

The Starlink Performance terminals are engineered for durability. They are designed for resilient connectivity in harsh and remote environments, extreme weather, and in-motion use (trains, boats, buses etc.).

They are perfect for businesses operating in areas where traditional internet infrastructure is lacking or unreliable, and for companies wanting the strongest performance from their Starlink service.

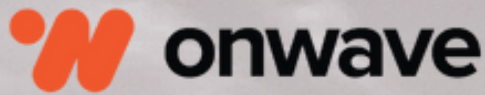

MINI

Starlink Mini is a compact, portable terminal that is ideal for team members working alone in remote locations, or who travel frequently and need to be online. It is a great solution for areas where cellular connectivity is unreliable. Providing a direct Wi-Fi connection to the user, with 100% coverage guaranteed.

ENTERPRISE

Starlink Enterprise is a great starter terminal for fixed site applications. You can enjoy greater installation flexibility with a longer cable and choice of mount. It is ideal for small businesses and can be connected to existing network equipment for simple deployment and increased resilience.

Why purchase Starlink from Onwave?

Onwave is proud to be one of a select few Authorised Starlink Resellers worldwide. When you purchase through us, you're guaranteed genuine Starlink hardware, the latest service plans and fully managed service options backed by expert support.

From installation to decommissioning, we handle every step, ensuring a seamless experience. Our Online Customer Portal and centralised billing gives you real-time visibility into the performance and status of all your Starlink terminals, centralising monitoring across your entire network.

Need help? Our dedicated 24/7 support team and Network Operations Centre are always available, connecting you with real experts who understand your deployment and deliver rapid, effective solutions.

With fast delivery and a service designed to help your business stay connected and competitive, Onwave is your trusted partner in a digitally driven world.
